WORK EXPERIENCE

Principal at Infinitive Consulting   **Richmond, VA**
Capital One: Software Design Lifecycle   October 2018 - Present
- Supported Capital One in defining and unifying the development lifecycle to provide a streamlined, standardized, & simplified experience while strengthening risk posture by ensuring continuous compliance with industry standards, best practices, & controls.
- Developed & designed multiple iterations of an SDLC Value Stream Map deliverable by incorporating new information gathered from empathy session interviews, metrics gathered from various POCs, & continuous stakeholder feedback for the existing requirements.
- Interacted with key client system matter experts, end users, & business process owners in order to gather requirements & document affected business processes. Characterized the current state as-is business process & desired state to-be business process, documented relevant business processes to be supported.

Technical Cloud Analyst & Scrum Master at Take2It Consulting   **Arlington, VA**
Department of Homeland Security (DHS) Office of the Chief Technology Officer   July 2017 – October 2018
- Scrummed a ten-person team that finalized 900+ stories developing a multimillion dollar cloud infrastructure automation platform comprising of 21 tools that will enable DHS to migrate to the cloud.
- Mitigated project failure by structuring delivery with the implementation of the Agile framework, which included creating product roadmaps, establishing the product backlog, and leading Agile ceremonies.
- Institutionalized Cloud Factory by generating a full suite of system engineering lifecycle documentation required for the completion of security assessments, organizational acceptance, and solution migration.
- Assured on-time delivery by adopting a subject matter expert role and spearheading the security assessment, saving the lead architect four months' worth of work.

Business Analyst at Triumph Enterprises   **Arlington, VA**
Transportation Security Administration (TSA) System Architecture Branch   February 2016 - July 2017
- Designed architectural and business frameworks for implementing a modularized, interconnected security architecture to synchronize global security.
- Established the System Architecture Branch by communicating the program's strategic value to TSA executives and garnering buy-in by synthesizing complex technical concepts into consumable briefings.
- Stimulated contract growth by aligning Deloitte's SoW with the client's evolving vision resulting in a new taskforce and twice the number of resources for the System Architecture support team.
- Implemented project management solutions that streamlined tasks and amplified resources enabling the team to exceed client expectations by pursuing value-added projects outside the scope of the contract.

Document Management Consultant at PAE   **Washington, D.C.**
Department of Justice (DoJ) 9/11 Victim Compensation Fund   June 2015 - February 2016
- Co-managed a fast track project that increased finalizations by 300% and developed KPIs tracking trends, output levels, and performance that enabled executive decision-making and informed continuous process improvements.
